

ALLULOSE

CUT THE SUGAR, NOT THE TASTE

Having issues formulating great tasting reduced sugar applications?
Look no further, ALLULOSE is your secret weapon!

Consumer demand for health and wellness is on the rise, but they are not willing to give up on great taste. That's where Allulose can help. Allulose is a low-calorie sweetening option offering the uncompromised taste and mouthfeel of sugar, without all the calories or glycemic impact.

Allulose behaves like sugar in a variety of applications, such as snacks, beverages, and ice cream, making formulation easier for food and beverage manufacturers.

BENEFITS

LOW CALORIES

- 90% fewer calories than sugar without compromising taste
- No lingering aftertaste

NO ADDED SUGAR

- No impact on blood sugar
- Consumer friendly labeling
- Exempt from sugar/added sugar on label

NON-ARTIFICIAL

- Healthy lifestyle
- Increased consumer appeal

SUGAR-LIKE FUNCTION

- Mouthfeel and texture like sucrose
- Formulates in a variety of food & beverages
