

The Power of VINIA®

Harnessing the power of nature, BioHarvest developed VINIA® – a way to deliver many of the benefits of red wine in a new form **without the sugars, calories, or alcohol**. VINIA® is created through a patented Biofarming technology that develops cells with a concentration of piceid resveratrol 100 times that found in red grape skin together with a matrix of polyphenols (catechin, quercetin, tannins, and anthocyanins.) **VINIA® is able to deliver many wellness benefits.**

Biofarming Benefits

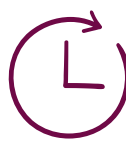

- Makes targeted metabolites easily accessible and usable
- Ensures highest bioavailability and efficacy of compounds for humans
- Produced in totally aseptic conditions
- Eliminates seasonality in growing
- Economical
- Consistent
- Environmentally friendly

Fast Absorption into
Blood Stream

Supports Blood
Circulation

Long Lasting
Effect

Supports Healthy Arteries &
Fuels Antioxidant Activity

- Piceid Resveratrol from Red Grape Skin
- Supports Blood Pressure Already within Normal Range
- Sustainable — one bioreactor utilized in the Biofarming manufacturing process produces the equivalent annually of 10,000 square meters of land
- Improves Physical Energy and Mental Alertness via the delivery of increased blood flow and oxygen to the body's tissues and organs
 - The solubility of VINIA® Piceid Trans-resveratrol (resveratrol connected to a glucose molecule) in water is 25.5 x's higher compared to the solubility of Trans resveratrol (without glucose).^{[1] [2] [3]}

All the goodness, none of the additives.

While a glass of Merlot or Pinot Noir can be good for you, to truly reap the benefits of red wine, you would need to drink 2-3 glasses of red wine every day. With VINIA®, you can now consume many of the benefits red wine offers without the sugar, calories or alcohol. VINIA® originates from the whole red grape, known for its polyphenols and antioxidant activity. One packet of VINIA® has a bouquet of polyphenols (20-40mg) which can boost your wellbeing.

Inspired by Vineyard, leveraging breakthrough BioFarming Technology for your Heart.

Daily consumption of VINIA® has been scientifically proven to support blood circulation, elasticity of blood vessels, and blood pressure already within normal range, and to fuel antioxidant activity. Unlike other products that offer just one nutrient or polyphenol, VINIA® offers a bouquet of polyphenols (piceid resveratrol, condensed tannins, quercetin, catechins and anthocyanins) found in red grapes in their natural structure with synergistic benefits.

82%
SOLUBILITY

VINIA® is 82% soluble compared to regular resveratrol at 1%.

14
PATENTS

VINIA® has 3 peer-reviewed studies, 8 scientific studies, 14 patents.

DISCLAIMER: Any suggested uses and statements of product benefits are provided for informational purposes only. It is the customer's responsibility to determine that its use of VINIA® in any particular application and any claims made about the customer's product comply with applicable laws and regulations.

VINIA® Applications

- Alternative Dairy
- Chocolate
- Confectionary
- Dairy
- Frozen Dairy
- Granola
- Nutraceuticals/Dietary Supplements
- Nutrition & Snack Bars
- Value-Added Yogurt

Non-GMO

Gluten-Free

Alcohol-Free
